Fresh Software Engineering graduate with a 1-year internship experience as a Front-end Developer. Seeking an opportunity to join a dynamic team as a Software Developer, open to roles in Front-end, Developer, Full-stack Developer or UX/UI design.
Eager to apply web development skills, continuously learn new technologies, and grow through feedback and collaboration.

Skills

Languages	HTML, CSS, Sass, JavaScript, TypeScript, Python, C (Basic), Java
Libraries & Frameworks	React.JS, Next.JS, Axios, Redux, TanStack Query, Apollo Client, TailwindCSS, Express.JS, Angular, Java Spring Boot
Database	PostgreSQL, MySQL, MongoDB
Tools	VS Code, Docker, Postman, Github, Asana, Slack, Notion, Claude Code, Gemini

Experience

04/2024 - 05/2024

Project PopulationIQ (Internship)
Project PopulationIQ is a web-based platform for testing IQ levels. It features interactive IQ tests, user-friendly
comments, and informative content pages. Designed to engage users and promote emotional intelligence
development, it offers a fun and educational experience.

04/2024 - 05/2024

Datability Company Website (Internship)
The internship project assigned to me was to create the website for Datability Company. My role was as a front end developer, tasked with building various components based on designs in Figma and integrating them to create an engaging and efficient landing page.

11/2024 - 09/2025

Internship Experience (Front-end Developer, 10 Months)
Completed a year-long internship focusing on front-end development with React.js, Next.js, Sass, TailwindCSS, Apollo Client, and TanStack Query. Responsibilities included developing user interfaces, integrating APIs, and enhancing system performance across multiple projects

Portfolio Website

01/2026 - Current

Be1 Digital Co.,Ltd. (Full Stack Developer)
I was assigned to manage government projects, a website for tracking cases of children who were not receiving proper care, and an e-learning website for employees. This was a coder role, working end-to-end with Angular and Java Spring Boot.

EDUCATION

2022 - 2025

Information Communication Technology (ICT), Major in Software Engineer.
University of Phayao

Relevant coursework: Learn programming languages like Java, Python, C, JavaScript and web development using HTML, CSS, JavaScript and frameworks for web apps.
